

Environmental Policy

OTICS USA Inc. is a world-class manufacturer and we are dedicated to the preservation of our environment. OTICS USA will take appropriate measures necessary to obtain this vision. OTICS USA views the following key principles as fundamental elements in achieving compliance with our Environmental Policy.

SUCCESS

- **Safe Operations** - OTICS USA is committed to the safe operation of its facilities to protect its employees and the environment.
- **Use of Manufacturing Materials and Products** - OTICS USA is committed to proper handling, use, and disposal for its products and materials used on site in an environmentally conscious manner.
- **Commitment to Continual Improvement and Enhance Environmental Performance** - OTICS USA will continually search for economically feasible and practical methods to improve operations while making improvements to and enhancing the environment.
- **Commitment to Prevention of Pollution** – OTICS USA will reduce waste at the source where economically feasible, recycle materials where practicable, and dispose of any remaining waste in an environmentally sound manner.
- **Environmental Compliance Commitment** – OTICS USA is committed to compliance with all relevant environmental legislation and regulations including the company's environmental policy. This commitment to compliance includes, but is not limited to, goals and objectives subscribed to by the company, requirements of our customers, and industry standards.
- **Solicit Input** - OTICS USA will solicit input and communicate its environmental policy and principles where applicable.
- **Support** – OTICS USA's management is committed to periodically review and reaffirm its environmental management system's alignment with environmental policy and to provide the resources necessary to accomplish its established programs. (Personnel, time, capital, and equipment)

Implementation of this policy is a fundamental management objective and the responsibility of every site employee at OTICS USA.

OTICS USA President
